# Which room heater? Our guide to our full range.

AREA	SUITABLE RANGES			
 <b>BATH OR SHOWER ROOM / WC</b>	 BHE PLUS	 CK 20 TREND LCD	 CK 20 PREMIUM	
 <b>LIVING</b>	 CNS-U PLUS LCD UK	 CON PREMIUM	 CND	 SHS
 <b>BEDROOM</b>	 CNS-U PLUS LCD UK	 CON PREMIUM	 CND	
 <b>WHERE LANDLORD PAYS THE BILL</b>	 CNS NC			
 <b>OCCASIONAL USE / PLANT ROOMS</b>	 CK 20 PREMIUM	 CK 20 TREND LCD		

## KEY

- › **BHE Plus\*\*** - Lot 20 compliant towel-rail heater.
- › **CK 20 Premium\*** - Where you want a premium rapid fan heater with silent mode.
- › **CK 20 Trend LCD\*\*** - Fast response fan heater when you want an affordable option that will heat an area with maximum speed.
- › **CNS-U Plus LCD UK\*** - A next level panel heater with enhanced aesthetics. & simple LCD controls.
- › **CNS NC\*** - Has time and temperature settings controlled by a landlord control with a timed boost option for tenants.
- › **CON Premium\*** - Premium build quality and aesthetics.
- › **CND\*\*** - The added luxury of a radiant element of heat (can be particularly valuable for comfort in older properties where surfaces can be cold to touch).
- › **SHS** - Choose wall or floor mounted storage heaters where you want to take advantage of off-peak electricity.

\*Splashproof IP 24, protection class I, \*\*Splashproof IP 24, protection class II.

### What size heater do I need?

Sizing heaters depends on the thermal values of the room and other factors such as ceiling height, air change rates, the local external temperatures and the desired internal temperatures and response times. We recommend you contact us with details of room sizes and U values or age-of-building information once you have selected the type of heater desired.

### To get a quick estimate of the size convector or fan heater you need\*:

1. Measure the size of your room in square metres
2. Select the required watts per square metre based on the age of your building below
3. Multiply the final figure by 1.3 to get a rough estimate of what wattage you require

\*Do not apply this method to storage heaters.

AGE OF BUILDING	WATTS PER SQM
2006 onward	45
2002-2005 onwards	48
1995-2001	64
Before 1995	135
