MyStiebel-App iOS

CONTROL UNIT/ENERGY MANAGEMENT

PRODUCT-NO.: 340550

Get a feel-good temperature in your home easily and conveniently using the app.

The app allows a heat pump's settings to be controlled via your home network. Besides controlling your heating, cooling and DHW systems, individual time programs can also be configured.

Furthermore, the app offers practical scenarios, such as holiday and absence, to match the output to the adjusted heat demand while you are away. This allows energy consumption to be reduced without compromising on comfort. Spontaneous and temporary adjustments to the preferred temperature are possible, without affecting the standard program for the days ahead.

To use the app, an internet service gateway is required, and the heat pump controller used must be compatible with the app.

The main features

Economy functions such as holiday and time programs

ECO tips for efficient energy consumption

Type	MyStiebel-App iOS
Part no.	340550
