INSTANTANEOUS WATER CYLINDERS

PRODUCT-NO.: 236481

**Let a strong team take care of the workIntegrate solar energy** Smart technology in the smallest of spaces: you don't have to give up much room to accommodate this buffer cylinder and DHW cylinder combination. An additional benefit is the high level of hygiene. As the appliance contains a very effective indirect coil, it stores only small quantities of domestic hot water. The buffer cylinder retains heat for room heating whenever you need it.

With one of our efficient heat pumps, you can easily connect an additional heat source. We also offer a version of the instantaneous water cylinder that allows you to enjoy the benefits of a solar thermal system as well.

## The main features

Space and price advantage due to two functions in a single cylinder

Only one cylinder for DHW heating and room heating

Halves the installation space required for separate cylinders

Universal application options
